

Preventive care drugs to help keep you healthy

At Kaiser Permanente, we don't just care for you when you're sick—we help you stay healthy too. One important part of maintaining good health is detecting and managing problems before they become serious. Depending on your personal situation, age, or health condition, your doctor may prescribe one or more of the preventive care drugs listed here.

They can help you stay your healthiest if you're at risk for certain conditions. Like most preventive care services, they're covered at little or no cost to you—even before you reach your deductible.

This list is only a sample of the preventive care drugs that may be available under your health plan. For a complete list or to find out if a drug is covered by your plan, call the Member or Customer Service number on your Kaiser Permanente ID card. This list is not a substitute for your plan formulary and may list drugs that are not covered under your pharmacy benefit.

Preventive care drug list
